- React.js

- Vue.js

- Node.js

- Webpack

CSS

- Tailwind CSS

- Materialize

Docker

### SOFT SKILLS

Communication

Fast Learning

Problem-solving

Motivation

Adaptivity

### EXPERIENCE

2022

\*

#### FREELANCER

I took up one small project and developed my own websites (messing around with technologies)

2020 - 2022

Sii

#### FULLSTACK DEVELOPER

For over two years I gained experience managing all aspects of the development process for medium-sized projects. My first project was to create new functionality and provide automated tests for it. Later on, I was entrusted with the duties of an IT architect of the apps I was writing.

2019 - 2020

Actio

#### FULLSTACK DEVELOPER

At Actio, I was responsible for developing new software and supporting existing functionality. I was responsible for creating software for the management of the telecommunication switchboard in a call center. One important thing I learned is to listen to what your co-workers and clients have to say and watch their needs. Although they may not realize it, other employees can be your best resource to learn both what to do and what not to do in the office.

2017

Homepay

#### INTERNSHIP

I completed a front-end internship for a small IT company at the end of my secondary school semester and gained a lot of knowledge about financial infrastructure. I enjoyed providing new functionalities to a fully-functional system.

### EDUCATION

2018 - now

Engineering

#### POZNAŃ UNIVERSITY OF TECHNOLOGY

I attend Poznań University of Technology (PUT) because of the diversity of opportunities. The school's large size allowed me the chance to find hobbies and causes that interested me and get involved in student organizations like ESTIEM and folk dances club. I knew I wanted to meet many types of people and have a range of experiences to broaden my knowledge and perspective and become a more well-rounded person.

2014 - 2018

IT Technician  
Degree

#### TECHNICAL SCHOOL AT PULAWY

I chose this school because I knew that in the future I wanted to have an education related to the IT industry. The IT technical school allowed me to learn the basics about computers, Internet networks, and applications. My studies ended with a month-long internship at Homepay sp. z o.o.
